LRP Power Pack 3000 - 8.4V - 7-cell Straight NiMH Stickpack with Traxxas TRX plug

Improved quality and more power – now also for Traxxas models!

Art. no.: 71152

With the new LRP stickpacks a completely new and updated budget line is available. The new power packs represent the next generation of powerful NiMH stickpacks featuring higher capacity, outstanding power delivery, lower internal resistance and a completely new and stylish design. The packs can be used in all R/ C racing applications.

Specially designed for Traxxas models:
- all packs come with Traxxas TRX plug for easiest connection to the car
- 6 cell (7.2V) and 7 cell (8.4V) packs available
- 7 cell packs available in straight or special Traxxas Hump configuration with one cell on top
- two different capacities: 3000 and 4600

All battery packs are supplied pre- assembled and ready- to- use including connectors. Only single- cell shrink wrapped cells by LRP are used in each LRP stickpack. Each cell has passed quality control and durability tests before it becomes a LRP stickpack.

Only high- quality LRP cells are used in LRP stickpacks – just BLUE IS BETTER!
